3rd International Conference

The Technology and Applications of Charge Coupled Devices

Organised by
University of Edinburgh Centre for Industrial Consultancy and Liaison in association with the Electronics Division of the Institution of Electrical Engineers and the Royal Signals and Radar Establishment.
STEERING BOARD

Dr. J. Mavor—Chairman  
Dr. G.F. Vanstone—Vice Chairman  
Professor W.E.J. Farvis  
Dr. J.W. Midgley

University of Edinburgh  
Royal Signals & Radar Establishment, U.K.  
University of Edinburgh  
University of Edinburgh

ADVISERS

Dr. D.F. Barbe  
Dr. I. Lagnado  
Professor O. Memelink

United States  
United States  
Europe

PROGRAMME COMMITTEE

Dr. J. Mavor—Chairman  
Dr. G.F. Vanstone—Vice Chairman  
Dr. D.F. Barbe  
Dr. I. Lagnado  
Dr. D.R. Lamb  
Professor O. Memelink  
W. Campbell—Secretary

University of Edinburgh  
Royal Signals & Radar Establishment, U.K.  
United States Navy Laboratories  
United States Navy Laboratories  
Southampton University  
Twente University, The Netherlands  
University of Edinburgh

INDUSTRIAL ADVISERS

Dr. G.F. Amelio  
Dr. R.D. Baertsch  
D.J. Burt  
Dr. D.D. Buss  
J. Cave  
Dr. L.J.M. Esser  
Dr. M.F. Tompsett  
Dr. K.H. Zaininger

Fairchild Camera & Instrument Corp., U.S.A.  
General Electric, Corporate Research and Development, U.S.A.  
General Electric Company, U.K.  
Texas Instruments Inc., U.S.A.  
Plessey Company Limited, U.K.  
Philips Research Laboratories, Eindhoven, The Netherlands  
Bell Telephone Laboratories, U.S.A.  
R.C.A. Laboratories, U.S.A.

This Conference was promoted by the University of Edinburgh Centre for Industrial Consultancy and Liaison as part of their function of fostering greater liaison between the University and Industry.

FOREWORD

CCD '76 is the third International Conference devoted entirely to the Technology and Applications of Charge-Coupled Devices.

The success of CCD '74 in Edinburgh and CCD '75 in San Diego, together with the sustained development of charge-coupled devices in their various roles, underlined the need for this third conference on charge-coupled devices.

These Proceedings comprise the papers of the five Conference sessions; one on significant technological development, three covering the major application areas of imaging, memory and signal processing, and a final session on systems with special emphasis on television. An important feature of the previous Conferences has been the inclusion of invited review papers in each session and, once again, reviewers of international standing give keynote papers. A comprehensive coverage of the latest advances in the subject is given by over forty high quality contributed papers from Industry, Government and the Universities.

The Steering Board and Programme Committee are convinced that CCD '76 will again provide a suitable forum for the exchange of ideas on the potential and limitations of the versatile charge-coupled device, and that these Proceedings will constitute a valuable source of reference material on CCD development in 1976.

The Conference Vice-Chairman, Dr. G.F. Vanstone of RSRE, Malvern, and I, take great pleasure in thanking the members of the Programme Committee for their efforts in soliciting and refereeing the papers. The efforts of our advisers in fostering the cause of CCD '76 is also greatly appreciated. We would acknowledge, too, the assistance of the Institution of Electrical Engineers and the Royal Signals and Radar Establishment, and the University of Edinburgh’s Centre for Industrial Consultancy and Liaison for their organisational and secretarial services.

JOHN MAVOR
Chairman CCD '76 and Proceedings Editor
CONTENTS

SESSION 1: THEORY AND TECHNOLOGY

M.F. Tompsett, Bell Laboratories, New Jersey, U.S.A.  

Simulation for Device Design at Short Gate Charge-Coupled Devices:  
a Complete CCD Shift Register Computer Model.  
S.G. Chamberlain and M.H. Elsaid, University of Waterloo, Ontario, Canada.  

Evaluation of Low Dark Current Charge-Coupled Devices.  

Influence of Surface States on the Charge Transfer along the Dielectric-Semiconductor Interface.  

CCD with Meander Channel.  
O. Ohtsuki, H. Sei, K. Tanikawa and Y. Miyamoto, Fujitsu Laboratories Ltd., Kobe, Japan.  

Design Aspects of S-Shaped Bulk Charge-Coupled Devices.  

Bucket Brigade Devices—Circa 1976.  
R.R. Buss and G.P. Weckler, Reticon Corporation, California, U.S.A.  

SESSION 2: IMAGING

Visible  
Charge-Coupled and Charge Injection Device Performance Tradeoffs.  
R.D. Baertsch, General Electric Corporate Research and Development, New York, U.S.A.  

H. Fu Tseng and G.P. Weckler, Reticon Corporation, California, U.S.A.  

Some Design Considerations of CCD Imaging Applied to High Accuracy Space Borne Star Sensors.  

Application of CCD Imagers in High Shock Environments.  
K. Ferris, R. Ely and L. Zimmerman, Naval Surface Weapons Center, Virginia, U.S.A.  

Low Light Levels  
Application of CCD Imagers and Low Light Levels.  

CBS-mode CCD for Low Light Level Imaging Applications.  

Operating of CCDs in the Electron Bombarded Mode.  
L. Caldwell, E. Smith and J. Boyle, Night Vision Laboratory, Fort Belvoir, Virginia, U.S.A.
The Advantages of CCDs for Imaging at Low Light and Contrast Levels.
S.B. Campana, Naval Air Development Center, Warminster, Pennsylvania, U.S.A.

Infra Red
Infra-red CCD Systems.
C.T. Elliott, Royal Signals and Radar Establishment, Malvern, U.K.
Monolithic Extrinsic Silicon 1RCCDs.
Calculation of Optimum Ionization Energy for Extrinsic Silicon Detectors.
R.M. Logan, Royal Signals and Radar Establishment, Malvern, U.K.

SESSION 3: MEMORY AND DIGITAL COMPUTATION
Device Design for CCD Digital Memory.
G.F. Amelio, Fairchild Camera and Instrument Corporation, Palo Alto, California, U.S.A.
The Application of Charge-Coupling Concepts to MOS Dynamic RAM Cell Design.
A.F. Tasch, Jr., P.K. Chatterjee, H-S Fu and T.C. Holloway, Texas Instruments Incorporated, Dallas, Texas, U.S.A.
Error Correction Coding with Charge Transfer Devices.
D.O. Carhoun, T.F. Roome and E.A. Palo, The MITRE Corporation, Massachusetts, U.S.A.
Charge-Coupled Device Digital Arithmetic Functions: Experimental Results.
T.A. Zimmerman and R.A. Allen, TRW Defense and Space Systems Group, Redondo Beach, California, U.S.A.
Finite Field Arithmetic with Charge Transfer Devices.
T.F. Roome, D.O. Carhoun and E.A. Palo, The MITRE Corporation, Massachusetts, U.S.A.
The CCD Memory in Microcomputer Systems
H. Kornstein, Intel Corporation Ltd., Oxford, U.K.

SESSION 4: SIGNAL PROCESSING
Spectral Analysis Using CCDs.
P.D. Buss, C.R. Hewes and M. de Wit, Texas Instruments Inc., Dallas, Texas, and R.W. Brodersen, University of California, Berkeley, U.S.A.
The Performance of a CCD Signal Averager Coded to Reduce Transfer Inefficiency Effects.
An Analysis of CCD Recursive Filters with Application to MTI Radar Filters.
A. Chowaniec, Bell Northern Research, Ottawa, Canada, and G.S. Hobson, University of Sheffield, U.K.
CCD Programmable Correlator.
E.P. Herrmann, D.A. Gandolfo, A. Boornard and D.B. Stepps, RCA Advanced Technology Laboratories, Camden, New Jersey, U.S.A.
A CCD Analog and Digital Correlator.
I. Lagnado and S. Steigerwalt, Naval Electronics Laboratory Center, San Diego, California, and J. Bond, J. Speiser and H.W. Whitehouse, Naval Undersea Center, San Diego, California, U.S.A.

Errors in Programmable CCD Transversal Filters and Correlators.

A Microcomputer-Controlled Adaptive CCD Transfer Filter.

CCD Accumulators in Spread Spectrum Signal Identification.

Signal Processors Incorporating CCD Shift Register Time Compressors.
P.M. Grant, M.A. Jack and J. Mavor, Dept. of Electrical Engineering, and D. Saxton, Wolfson Microelectronics Liaison Unit, University of Edinburgh, U.K.

A CCD Frequency Selective Filter.

A Quadruply Sensed CCD Transversal Filter for Quadrature Phasing.
C. Morandi, Istituto di Elettronica, Universita de Bologne, Italy, and H. Wallinga, Twente University of Technology, Enschede, The Netherlands.

Cancellation of Aliasing in a CCD Low-Pass Filter.

A Capacitively-Metered Input Circuit for Linear Operation of CCDs.
R.C. Tozer and G.S. Hobson, University of Sheffield, U.K.

A Time Delay and Integration CCD for a Serial Scanned IR Imager.

An MOS Amplifier for CCD Applications.
N. Weste, University of Adelaide, Australia, and J. Mavor, University of Edinburgh, U.K.

Bipolar Peripheral Circuitry for CCDs.

SESSION 5: SYSTEMS

Applications of Charge Transfer Devices in Television.

A CCD Analog Memory System for Slow-scan Conversion of Standard TV Video.
S.P. Buchanan and R.R. Clark, Martin Marietta Aerospace, Orlando, Florida, U.S.A.

An Experimental TV Ghost Cancellation Circuit with Automatic Gain Control.

TDMA Using Time-compressed Analog Signals.
H.L. Weinberger, Hughes Aircraft Company, El Segundo, California, U.S.A.
